[illegible]

0

● 〃 〃 〃

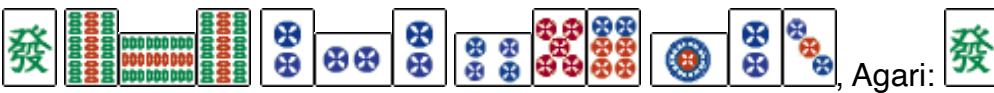

- "Tsubame gaeshi" may also refer to a cheating technique that is unrelated to the yaku. In this case, it means to swap tiles quickly between the wall in front of the player and his starting hand right after finishing haipai.

Shiiaru raotai

Shiiaru raotai 「十二落拾」 (lit. *Twelve tiles falling down*) is a hand with 4 called tile groups, waiting for a single tile (i.e. a hadaka tanki). Also known as **Suufuuro tanki** 「四副露単騎」 (lit. *Four-melded single-wait*).

Closed kans may or may not be allowed, depending on the ruleset.

- Value: 1 han

▪ Example: 

Kanburi

Kanburi / **Kanfuri** 「槓振り」 is a yaku scored for winning off an opponent's discarded tile right after they called a kan. The discard does not have to be the rinshan draw; as long as an opponent calls a kan and discards a deal-in tile immediately, the yaku is scored.

- Value: 1 han
- Trivia:
 - In early computer mahjong games, due to the difficulty of programming chankan, kanburi was often used to replace chankan (as a way to punish kan). This yaku is not used often outside of those games.

Sangen chiitoitsu / Suushi chiitoitsu

Sangen chiitoitsu 「三元七対子」 / **Suushi chiitoitsu** 「四喜七対子」 is a chiitoitsu hand containing pairs of all 3 dragons / all 4 winds, respectively.

- Value: 1 han (in addition to chiitoitsu's 2 han)

Kachoufuugetsu / Fuukasetugetsu

- Ron: (Sangen chiitoitsu) [replay 2]
- Tsumo: (Suushi chiitoitsu)
- [replay 3]

Uushin tsuukan 「五心通貫」 is a specific ittsuu hand with a kanchan wait of 5 on its straight part, thus appearing as: 123-46-789 at tenpai.

- Example:

Ketsupaihou / Keppaihou 「欠牌和、忒牌和」 (lit. *Missing tile*) is a hand with a penchan or kanchan wait, where 3 of the waiting tiles are already visible on the table. Sometimes a jigoku tanki wait is also accepted.

- Example:  Agari:  (When three 3-pin have previously been discarded)

External links

Toipuutao 「推不倒」 (*Reversible Tiles*, lit. *Can't be knocked over*) is a hand that consists only of tiles that look the same when turned upside down. This includes sangenpai haku and most pinzu and souzu tiles (all except 6-pin, 7-pin, 1-sou, 3-sou, and 7-sou).

- Value: 1 han

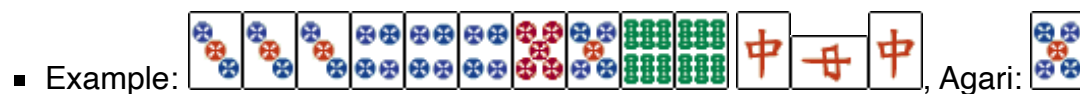

Two-han yaku

Sanrenkou

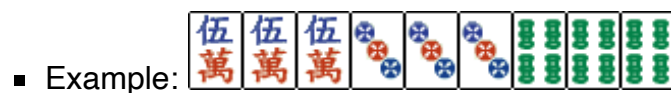

Sanrenkou 「三連刻」 (lit. *Three consecutive triplets*) is a hand with three triplets in an identical suit, where each triplet is 1 higher than the previous.

- Value: 2 han

A variation exists if the triplets are in different suits: **Sanshoku renkou** 「三色連刻」 (lit. *Three-colored consecutive triplets*).

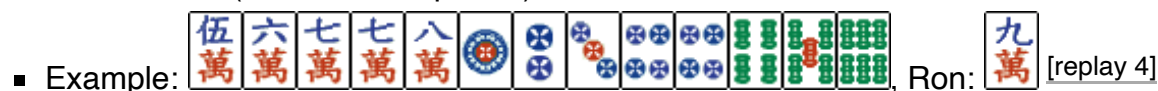

- Value: 2 han

Sanshoku tsuukan

Sanshoku tsuukan 「三色通貫」 (lit. *Three-colored straight*) is a hand containing sequences of 123, 456 and 789, with each sequence being in a different suit. Also called **Sanshoku ittsum** 「三色一通」, or **Hon ikkitsuukan** 「混一氣通貫」 (lit. *Mixed straight*).

- Value: 2 han (1 han when opened)

A derived variation exists if it's a tanki wait with sanshoku-tsuukan's mentsus already included: **Tanron** 「単竜」.

- Example:
- | | | | | | | | | | | | | |
|----|----|----|---|---|---|---|---|---|---|---|---|---|
| 四萬 | 伍萬 | 六萬 | 東 | 西 | 南 | 北 | 中 | 龍 | 鳳 | 南 | 南 | 南 |
|----|----|----|---|---|---|---|---|---|---|---|---|---|
- , Agari:
- | |
|----|
| 紅梅 |
|----|

Kyandonhou 「鏡同和」 (*Twice mixed double sequences*, lit. *Mirrored identities*) is a hand containing two groups of identical sequences in two different suits.

- Value: 2 han (either closed only, or open allowed with -1 han)

- Example:

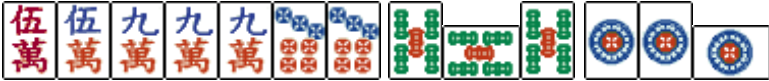

Ryandoukou

- Value: 2 han (in addition to toitoi's 2 han)

- Example: 
- Trivia:

A variation exists if those triplets are in three different suits: **Sanshoku choupaikou** 「三色跳牌刻」 / **Sanshoku sujipaikou** 「三色筋牌刻」 / **Sanshoku chousankou** 「三色頂三刻」.

- Value: 1 or 2 han

Example: , Ron:  (Sanshoku choupaikou & Sanshoku chousankou) [\[replay 7\]](#)

Suuzuukou

Suuzuukou 「四字刻」 (lit. *Four honor triplets*) is a hand containing four triplets (or quads) of honor tiles.

- Value: 2 han (actually at least 7 han based on toitoi, honitsu and at least one yakuhai)

Example: , Ron:  [\[replay 8\]](#)

Akadora sanshoku

Akadora sanshoku 「赤ドラ三色」 (lit. *red dora three colors*) in a hand containing all three red fives.

- Value: 2 han (or 5 han when including the dora value of red fives)

Example: 

Two-han and above

Open riichi

Main article: [Open riichi](#)

Open riichi 「オープンリーチ、開立直」 is a riichi hand while the full hand is revealed to their opponents after declaration.

- Value: 2 han (supersedes the normal riichi)

A variation exists if the declaration is daburu riichi: **Open double riichi** 「オープンダブルリーチ、開両立直」.

- Value: 3 han (supersedes the normal daburu riichi)

In some rulesets, this yaku turns into a yakuman if another player intentionally deals into the open riichi.

Isshoku sanjun

Isshoku sanjun / **Iisou sanshun** 「一色三順」 (lit. *Pure triple sequences*) is a hand built with three identical sequences, in both numbers and suit.

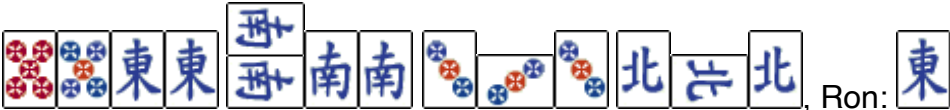

- Value:
 - 2 or 3 han
 - Closed only, or allowing opened-hand with 1-han decreased
 - Supersedes iipeikou

- Example: , Agari: 

Sanpuukou / Otakaze sankou

Sanpuukou 「三風刻」 (lit. *Three wind triplets*) is a hand with three wind tile triplets.

- Value: 2 han in general

- Example: , Ron:  [replay 9]

A variation exists if all the three wind triplets are guest winds: **Otakaze sankou** 「客風三刻」 (lit. *Three guest-wind triplets*). It is only available for the player with their seat wind identical to the current prevalent wind, e.g. East player in East round, or South player in South round, and so on.

- Value: 2 or 3 han

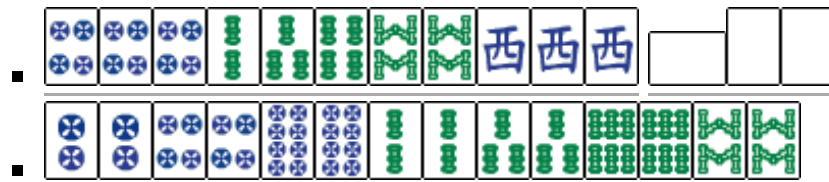

Three-han and above

Pinzu of 2 / 4 / 8,
Souzu of 2 / 3 / 4 / 6 / 8,

All wind tiles, and
Haku and hatsu

Such hand is available in chiitoitsu form.

- Value: 3 han (2 han when opened)
- Examples:

In some rulesets, Tanfonhou is split into two variants: **Hontanfon** 「混断紅」, which allows honor tiles; and **Chintanfon** 「清断紅」, which forbids honors.

- Value:
 - Hontanfon: 3 han (2 han when opened)
 - Chintanfon: 6 han (5 han when opened)

Chinpeikou

Chinpeikou 「清盃口」 is a ryanpeikou hand where both sets of sequences share the same numbers. Also called **Ryanpeikou doujun** 「二盃口同順」.

- Value: 3 han (actually 6 han based on ryanpeikou's 3 han)

- Example: Ron: [replay 12]
- Trivia:

- The kanji prefix "chin" 「清」 in mahjong is usually used to indicate a yaku variant which is built without containing honor tiles. However, this yaku does allow honors.

Mangan for actions taking on specific tiles

The following yaku are achieved by taking actions on some particular tiles. These yaku are often inspired by idioms, verses, or simply the tile patterns.

There are two common scoring mechanics on them:

1. Directly scored as a mangan, unless the hand can be scored higher in another way.
2. An additional 1 han for the specific operations, which in essence values 2-han in total.

Sometimes both two scoring methods are applied simultaneously, where the higher scoring one is used.

Kinkei dokuritsu

Kinkei dokuritsu / **Chinchi dourii** 「金鶏独立」 (lit. *A golden rooster standing alone*) is a four-melded hand waiting for 1-sou's hadaka tanki. Ankans are allowed. Also called **Chinchiihou** 「金鶏和」.

The pattern of 1-sou indicates the golden rooster, while the waiting pattern of hadaka-tanki refers to aloneness.

- Value: Mangan, or additional 1 han based on shiiaru raotai's 1-han.

- Example:                                   

Ipin mouyue / Iton mouyue 「一筒摸月」 is a special haitei raoyue hand with the pinzu of 1 as haiteihai. Also written as **Ipin raoyue** 「一筒撈月」.

The pattern of 1-pin indicates the moon.

- Value: Mangan, or additional 1 han based on haitei's 1-han.

- Example:  , Haitei tsumo:  [replay 16]

Chuupin raoyui

Chuupin raoyui 「九筒撈魚」 is a special houtei raoyui hand with the pinzu of 9 as houteihai.

The pattern of 9-pin indicates a school of fish.

- Value: Mangan, or additional 1 han based on houtei's 1-han.

- Example:  Houtei ron: 

Mangan or above

Shanron chonchu

Shanron chonchu 「双竜争珠」 (lit. *Two dragons fighting over pearls*) is a special kyandonhou hand with more restrictions:

The two groups of sequences are limited in manzu and souzu;

The head pair is restricted to pinzu;

The number of sequences cannot be overlapped, e.g. 234 + 456 is invalid.

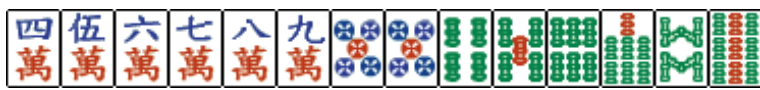

As how the yaku name indicates, the pinzu pair is the ball, while two sequence groups are the two dragons battling for the ball.

- Value: Mangan in general

- Example:

Rarely, this yaku values yakuman with restrictions of consecutive sequences and 5-pin as the pair.

- Value: Yakuman (may limited to closed-hand only)

- Example:

Chiishin uushii

Chiishin uushii 「七星無靠」 (lit. *Seven-star unconnected*) is a hand by collecting fourteen different tiles listed as follows:

Seven different tiles from 147 / 258 / 369 both in different suits;
All of seven different honor tiles (indicating the seven stars).

Unlike shiisan / shiisuu puutaa, this yaku is not restricted to starting-hand only.

- Value: Mangan or yakuman

- Examples:

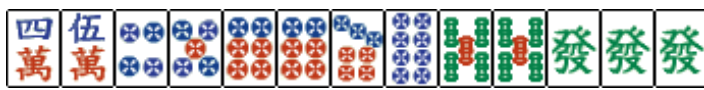

Renhou

Main article: Renhou

Renhou 「人和」 (*Humanly hand, Hand of man, Blessing of human*) is a yaku achieved by a non-dealer player wins by ron with their starting hand, before drawing a tile. Similar to tenhou and chiihou, any calls will nullify the yaku.

- Value: Mangan / Baiman / Yakuman

- Example:

Ron:  (Turn 0). [replay 17]

Can be treated as a 4 han yaku or 8 han yaku (allowing it to stack with regular yaku).

Maneman

Maneman 「真似満」, also called **Maneshi mangan** 「真似満貫」, is a yaku achieved by mimicking opponent's discards. The most common rule is: if a player has their discards identical to some opponent in the first row (usually from 1st to 5th / 6th turn), maneman is applied, and the opponent will pay out a mangan if that player wins.

Similar to nagashi mangan, the condition breaks if anybody calls a tile related to the maneman. An opponent calling a tile after maneman is fulfilled will not cancel the maneman.

- Value: Mangan

Some variations exist:

- Can only imitate the discards from a dealer, meaning only non-dealers can achieve this yaku.
- Value can be increased if more tiles are mimicked, e.g. 7th turn haneman, 9th turn baiman, and so on.

Yakuman

Paarenchan

Paarenchan 「八連荘」 (lit. *Eight consecutive dealership*) is a special winning state related to renchan. Roughly speaking, if a player successfully keeps his dealership for eight continuous rounds, or simply wins eight hands continuously, the hand he won at the last time will be automatically scored as a yakuman, as long as it is a valid winning hand.

More specifically, there are three main variants to determine a paarenchan:

Definition 1: Winning eight hands consecutively, no matter if the player is the dealer at that round.

Definition 2: Winning eight hands continuously exactly in his own dealership (as how the yaku name strictly indicated).

Definition 3: Successfully accumulates eight honba points on his own. Usually a hand must be won at the last honba, while it doesn't matter for the previous ones.

Rulesets that include paarenchan will usually include the optional restriction of ryanhhan-shibari, which is applied dealer after the fifth round. (This means that, past the 5th honba, each winning hand must be 2+ han.)

- Value: Yakuman

The following charts show their differences on tracking a valid state of paarenchan:

Round	Honba counter	Player's wind	Paarenchan counter	
			Def. 1	
East 1 R.	0 honba	North	1	Agari
East 2 R.		West	2	
East 3 R.		South	3	
East 4 R.	1 honba	East (dealer)	4	
			5	
			6	
			7	
			8	

Round	Honba counter	Player's wind	Paarenchan counter			
			Def. 2		Def. 3	
East 1 R.	0 honba	North	Ryuukyoku			
East 2 R.	1 honba	West				
East 3 R.	2 honba	South				
East 4 R.	3 honba	East (dealer)	-	Tenpai	1	Agari
	4 honba		1	Agari	2	
	5 honba		2		3	Tenpai
	6 honba		3		4	Agari
	7 honba		4		5	
	8 honba		5		6	Tenpai
	9 honba		6		7	
	10 honba		7		8	Agari
	11 honba		8		-	

Depending on ruleset, the dealership may automatically rotate after paarenchan, or allowing the dealer to continue the next loop of paarenchan progress.

Ishi no ue ni mo sannen

Ishi no ue ni mo sannen 「石の上にも三年」 (lit. *Three years on a rock*) is a yaku achieved by winning a double-riichi hand with haitei raoyue or houtei raoyui.

- Value: Yakuman
- Examples:

- Example:

Similar to kyuushu kyuuhai, these yaku are only recognized in the first turn of each player, and any calling actions will nullify the yaku.

Suurenkou

Suurenkou 「四連刻」 (lit. *Four consecutive triplets*) is a hand containing four triplets (or quads) in one suit where their numbers are increased by 1.

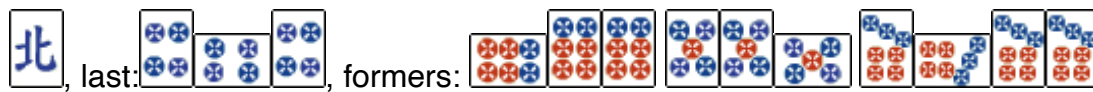

- Value: Yakuman

- Example:

The following hand is also called **Junsei suurenkou** 「純正四連刻」 (lit. *Pure four consecutive triplets*): shanpon-machi with either waits ensures a suurenkou.

- Example:

The rule of sekinin barai can be applied in this yakuman hand.

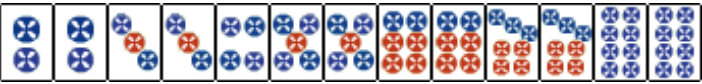

Toimen becomes liable for feeding the last required set: pinzu of 4.

Daisharin / Daichikurin / Daisuurin

Main article: Daisharin

Daisharin 「大車輪」 (*Big wheels*) is a closed hand with a pattern of 22334455667788 in pinzu. Likewise, **Daichikurin** 「大竹林」 (*Bamboo forest*) and **Daisuurin** 「大数隣」 (*Numerous numbers*) is achieved by using the same pattern in souzu and manzu respectively.

- Value: Yakuman
- Examples:

- 
 Ron:  (Daisharin) [replay 22]
- 
 Tsumo:  (Daichikurin) [replay 23]
- 
 Ron:  (Daisuurin) [replay 24]

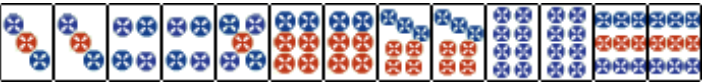

■ Trivia:

- When this yaku is not recognized, such hand scores at least a sanbaiman (11 han): pinfu's 1 han + tanyao's 1 han + ryanpeikou's 3 han + chinitsu's 6 han.
- The concrete definition of daisharin may vary in each platform. Some is define it as ryanpeikou, others define it as chiitoitsu. Both definitions are identical under the general ruleset, but this does impact the available yaku if aotenjou is used.

Shousharin / Shouchikurin / Shousuurin

Shousharin 「小車輪」 is a concealed hand with seven consecutive pinzu pairs from 1 to 7, or from 3 to 9. Similarly, **Shouchikurin** 「小竹林」 and **Shousuurin** 「小数隣」 are the variants of souzu and manzu correspondingly.

- Value: Usually yakuman, sometimes sanbaiman or lower
- Examples:

- 
 Tsumo:  (Shousharin) [replay 25]
- 
 Tsumo:  (Shouchikurin) [replay 26]
- 
 Agari:  (Shousuurin)

■ Trivia:

- When the yaku is not recognized, such hand values at least a baiman (9 han), with chinitsu's 6 han + ryanpeikou's 3 han. Unlike daisharin, pinfu is not always guaranteed.

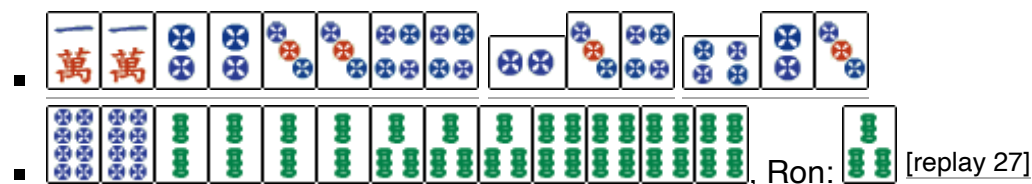

- The usage of yaku is not as common as daisharin. Usually this yaku is defined accompanying with daisharin as a weaker version.

Isshoku yonjun

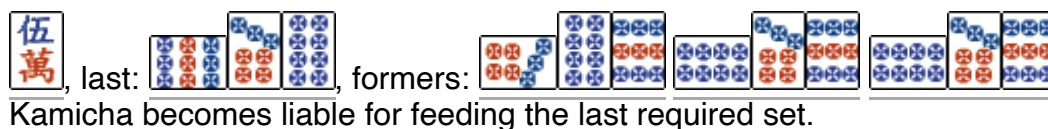

Isshoku yonjun / **Iisou suushun** 「一色四順」 (lit. *Pure quadruple sequences*) is a hand containing four identical sequences in a same suit. Also known as **Suuren taihou** 「四連太宝」.

This yaku may be either closed only or allowed open. The difficulty comes from the process of collecting those twelve tiles with continuous numbers in one suit, while only the kamicha can help to feed the tiles. Generally not reduced in value when open (similar to other yakuman).

- Value: Yakuman
- Examples:

The rule of sekinin barai can be applied in this yakuman hand. Due to the limitation on claiming chii, only kamicha can be the target of responsibility.

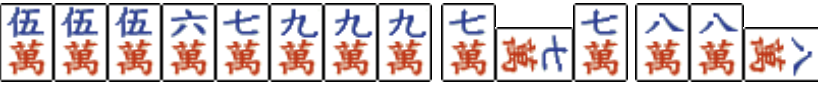

Hyakuman goku

Hyakuman goku 「百万石」 (lit. *One Million Koku*) is a chinitzu hand of manzu where all of their numbers can be summed up to over a hundred. As how the yaku name indicated, a million is achieved by multiplying 100 by ten thousands, the unit of manzu.

- Value: Yakuman
- Examples:

-  Agari:  (102), Yasume:  (95)
-  (100 exactly)
-  (130 maximum)

■ Some variation may exists as follows:

- Only scores the exactly 100 cases as a yakuman.
- Scores the exactly 100 cases as a double yakuman. Such hand is also called **Kaga hyakuman goku** 「加賀百万石」 (lit. *Kaga's Million Koku*) / **Junsei hyakuman goku** 「純正百万石」 (lit. *Pure Million Koku*).
- May allow summing up a hand for honitsu.

■ Trivia:

- A koku (石) is a traditional Japanese unit of volume equal to approximately 180 L (48 U.S. gal.), which volume of rice is approximately 150 kg (330 lb). The yaku is a reference to the Kaga Domain, which had the largest kokudaka, or assessed value, in feudal Japan: one million koku.

Yakumans related to specific tiles

Kachoufuugetsu / Fuukasetsugetsu

Kachoufuugetsu 「花鳥風月」 and **Fuukasetsugetsu** 「風花雪月」 are the hands built by four types of triplets, each representing a specific thing mentioned in the yaku name.

■ Example:  Ron:  [replay 30]

■ Trivia:

- The yaku name originates from the verse 「萬緑叢中紅一點」, lit. *A little red in the greenery*. Sometimes, it refers to the only woman in a group of mostly men.

Benikujaku

Benikujaku 「紅孔雀」 (lit. *Red peacock*) is a hand only built by the **red** souzu tiles (souzu of 1, 5, 7 and 9) and sangenpai chun.

This yaku is harder than ryuuiisou and chinroutou, as it only contains five kinds of available tiles, and they can't form any sequences.

■ Value: Yakuman

■ Example:  Agari:  [replay 31]

■ Trivia:

- This yaku is derived from ryuuiisou, as it utilizes the tiles not used by ryuuiisou. It used to have a name **Kouiisou** 「紅一色」 (lit. *All red*), but it's vague due to the fact there are many other tiles that also containing red. Hence, this hand is renamed with the peacock pattern of the 1-sou.

Kokuiisou

Kokuiisou / **Heiisou** 「黒一色」 (lit. *All black*) is a hand built only by the **black** tiles: the pinzu of 2 / 4 / 8 and four kinds of wind tiles.

The hand is available in either toitoi or chiitoi form.

■ Value: Yakuman (or sanbaiman in some rules)

■ Examples:

■ 

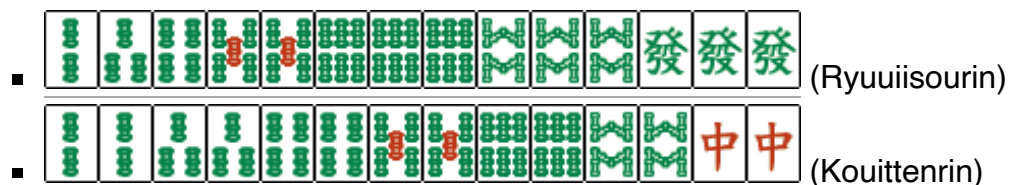

Ryuuiisourin / Kouittenrin

Ryuuiisourin 「緑一色輪」 is a hand similar to ryuuiisou by replacing the pair with the souzu of 5. Likewise, we get **Kouittenrin** 「紅一点輪」 by replacing the pair based on a kouitten hand.

Such hands are available in chiitoitsu form, as they both contain seven kinds of available tiles to build a hand.

- Value: Yakuman
- Example:

Yakumans related to specific things

Golden Gate Bridge

Golden Gate Bridge 「ゴールデンゲートブリッジ、金門橋」 is a hand containing all four sequences of 123, 345, 567 and 789 in one suit.

The yaku name is inspired from the Golden Gate Bridge in San Francisco. The "pair"s of 33 / 55 / 77 indicates the piers of bridge, while the whole group of sequences with tiles from 1 to 9 indicates the bridge deck.

- Value: Yakuman
- Example:

 Tsumo: [replay 32]

Depending on rulesets, different restrictions may be applied, such as:

- Closed-hand only

- Restricted in chinitsu-form only
- Head pair must be 5 in the same suit, which makes the hand even harder (may sometimes valued double yakuman in this case)
 - The stack of four 5-tiles indicates the structure of largest pier in the middle.

American Civil War

Nanboku sensou 「南北戦争」 (*American Civil War*) is a hand built with two triplets of South and North, a set of "1861" in identical suit, and a set of "1865" in another suit.

- Restriction:
 - Menzenchin only.
 - The triplet of South / North is usually not allowed to be melded or be an ankan.
 - The two groups of years are usually not allowed to have the same suit.
- Value: Yakuman

- Example: 
- Trivia:

- The yaku originates from American Civil War. Two sets of numbers indicate its starting year 1861 and the ending year 1865, while two sets of honors indicate the two belligerents: southern United States and northern United States.
- The yaku comes from American mahjong, which generally doesn't follow the pattern of traditional mahjong (multiple sets and a pair).

Touhoku Expressway

Touhoku jidoushadou 「東北自動車道」 (*Touhoku Expressway*) is a hand only using pinzu of 2 / 4 / 6 and wind of East / North.

The pinzu of 2 / 4 / 6 represents two-wheelers (二輪車), ordinary cars (普通車), and large cars (大型車) correspondingly.

- Value: Yakuman

- Example: 
- Trivia:

- Trivia:
 - Ao no Domon is a tourist attraction in Yabakei gorge, now part of Nakatsu City, Oita Prefecture, in Japan.
 - This hand is invented by a Japanese author Kan Kikuchi, who recorded the stories about Ao no Domon in his book *Onshuu no Kanata ni* 「恩讐の彼方に」. He is also an avid player on mahjong.

Multiple yakuman

Daichisei

Main article: Daichisei

Daichisei / **Daichiishin** 「大七星」 (lit. *Big seven stars*) is a chiitoitsu hand containing all the seven kinds of honor tiles. Also called **Jihai chiitoitsu** 「字牌七対子」 (lit. *Seven pairs of honors*).

- Value: Double yakuman

■ Example:  Ron:  [replay 33]

When daichisei is not recognized, the hand is scored as a regular tsuuiisou.

Junsei ryuuiisou

Junsei ryuuiisou 「純正緑一色」 (lit. *Pure all green*) is an all-green hand without hatsu, thus limiting the hand to: 2, 3, 4, 6 and 8 sou. It is also called **chinryuusou** 「清緑色」 (lit. *pure green*) or **hatsu-less ryuuiisou** 「発なし緑一色」.

- Value: Double yakuman

■ Example:  Ron:  [replay 34]

When junsei ryuuiisou is not recognized, the hand may value:

- Single yakuman as ryuuiisou

- 6 / 7 han as tanyao chinitzu, or 5 / 6 han as chinitzu-only with kuitan-nashi, if the variation of ryuuiisou requires hatsu must be contained in hand.
